

BEFORE THE STATE ENGINEER OF OREGON

WALLOWA COUNTY.

IN THE MATTER OF THE DETERMINATION)
OF THE RELATIVE RIGHTS TO THE USE OF)
THE WATERS OF IMNAHA RIVER AND ITS)
TRIBUTARIES, A TRIBUTARY OF SNAKE)
RIVER.)

FINDINGS AND ORDER
OF
DETERMINATION.

Now at this time the above entitled matter coming on for consideration by the State Engineer, and it appearing that all evidence and testimony has been taken in the above entitled proceeding, and the State Engineer having carefully considered all of such evidence and testimony and the engineering data and information gathered in accordance with law, and being now fully advised in the premises, makes and orders to be entered of record in his office the following

FINDINGS AND ORDER OF DETERMINATION

1.

That on the 11th day of January, 1924, there was filed in the office of the State Engineer a petition signed by Fred W. Falconer and others, requesting a determination of the relative rights of the various claimants to the use of water from Imnaha River and its tributaries. That the State Engineer thereupon fixed a time for the making of the necessary surveys and examinations, and the beginning and taking of such testimony as would enable him to determine the rights of the various claimants to the use of water from said stream, as provided by law.

2.

That a notice was prepared by the State Engineer setting forth a date when he or his assistants would begin an investigation of the flow of said stream and its tributaries, and the ditches diverting water therefrom; and said notice was published in two issues of The Joseph Herald, a newspaper published weekly at Joseph, Wallowa County, Oregon, and of general circulation in said county; said two issues being those of July 26 and August 2, 1928; and said notice was also published in two issues of the Enterprise Record Chieftain, a newspaper published weekly at Enterprise, Wallowa County, Oregon, and of general circulation in said county; said two issues being those of July 26 and August 2, 1928; the date of the last publication of the notices in each case being more than ten days prior to the date fixed for the beginning of the measurements of said stream by the State Engineer, as provided by law.

3.

That the time when the State Engineer or his assistants should begin the examinations of said stream and its tributaries was set for August 10, 1928. That

at the time so specified, duly qualified assistants of the State Engineer did proceed to make an examination and surveys of said stream and its tributaries, and of the ditches and canals diverting water therefrom, and of the lands irrigated by the waters of said stream and its tributaries; which observations and measurements were reduced to writing and made a matter of record in his office. And the State Engineer did cause to be prepared a set of maps or plats, on a scale of measurement of four inches to the mile, showing with substantial accuracy the course of said stream and its tributaries, the location of the various ditches diverting water therefrom, and the number of acres of land which had been irrigated in each legal subdivision; blue prints of said maps being now on file and a part of the record herein.

4.

That after said examination and measurements were completed, a notice was prepared by the State Engineer setting forth a time and place certain when he would begin the taking of testimony (statements and proofs of claim) as to the relative rights of the various claimants to the use of the waters of said stream and its tributaries; and said notice was published in two issues of *The Joseph Herald*, a newspaper published weekly at Joseph, Wallowa County, Oregon, and of general circulation in said county, said two issues being those of April 18 and 25, 1929; and said notice was also published in two issues of the *Enterprise Record Chieftain*, a newspaper published weekly at Enterprise, Wallowa County, Oregon, and of general circulation in said county, said two issues being those of April 18 and 25, 1929; the date of the last publication of said notice in each case being more than thirty days prior to the date fixed for the beginning of the taking of testimony by the State Engineer, as provided by law.

5.

That on the 17th day of April, 1929, the State Engineer did send by registered mail to each person, firm or corporation claiming a right to the waters of said stream, or any tributary thereof, and to each person, firm or corporation coming or being in possession of land bordering on or having access to said stream, or its tributaries, insofar as the names of said claimants, owners, firms or corporations could be reasonably ascertained, a notice similar to the published notices as described in Paragraph 4, setting forth a time and place when the State Engineer would commence the taking of testimony (statements and proofs of claim) as to the

Relative rights of the various claimants to the waters of said stream or its tributaries. And the State Engineer did enclose with each of said notices a blank form upon which claimants or persons in possession could present in writing all the particulars necessary for the determination of his rights to the waters of said stream, under oath.

6.

That the times and places when and where the said State Engineer or his duly authorized assistants should attend and take the testimony of the various claimants were fixed as follows; to-wit:

On Tuesday, June 4, 1929, at the Grange Hall, at Imnaha, Oregon.

On Wednesday and Thursday, June 5 and 6, 1929, in the Circuit Court Room of the County Court House at Enterprise, Oregon.

And for a period of 30 days, beginning with Monday, June 10, and ending with Tuesday, July 9, 1929, at the office of the State Engineer in the Capitol Building at Salem, Oregon.

That during the period so specified, claims to the use of the waters of Imnaha River and its tributaries were filed by the following parties, to-wit:

Arnold, A.F.	Enterprise, Ore.	Litch Land & Cattle Co., Inc.,	Enterprise, Ore.
Barton, R.A.	Imnaha, Ore.	Longley, E. J.	Fruita, Oregon

8.

That upon the completion of the taking of said testimony (claims) the State Engineer did on the 10th day of July, 1929, give notice by registered mail to each of the various claimants to the use of the waters of said stream, that at the times and places named in said notice, to-wit:

INMAHA RIVER - 6 -

On Tuesday, July 23, 1929, at the Grange Hall, above
Immaha, Oregon.

On Wednesday, July 24, 1929, at the County Court House
at Enterprise, Oregon.

From Thursday, July 29, until August 9, 1929, inclusive, (Sundays
and holidays excepted), at the office of the State Engineer in the
Capitol Building, Salem, Oregon.

That said notice did also state therein the county in which the
determination of the State Engineer in said proceedings would be heard by the
Circuit Court of the State of Oregon, to-wit: Wallowa County. That a duly author-
ized representative of the State Engineer did, in accordance with said notice,
keep said testimony and claims open to public inspection at the times and places
aforesaid.

9.

That the Immaha River is a non-navigable, perennial stream, rising
in the Wallowa Mountains in Wallowa County and flowing northeasterly into the
Snake River; that the waters of said stream and its tributaries are used to a
limited extent for the irrigation of narrow strips of lands, small in area, and
commonly designated as "shoe-string ranches". The lands are arid and irrigation
is necessary for the raising of profitable crops.

10.

That at the time the testimony and proofs of claims were open to
public inspection at the Grange Hall above Immaha, Oregon, namely: on July 23,
1929, the following stipulation was filed:

"R. A. Barton, party of the first part, and Chas. Crader, James Estes,
Albert Morgan, and Jay H. Stanley, party of the second part, do hereby make the
following stipulation, without contest, in settlement of certain differences a-
rising in connection with the acreage claimed by R. A. Barton, in Section 22,
T. 3 S. R. 48 E.

The party of the first part hereby agrees to have 1.8 acres in the
 $SE\frac{1}{4} NE\frac{1}{4}$, and 4.6 acres in the $NE\frac{1}{4} SE\frac{1}{4}$ of Section 22, T. 3 S. R. 48 E. W. M., stricken
from his proof, more particularly described as Statement and Proof of Claim No. 2,
filed June 4, 1929, for and in consideration of the right to enlarge the Park
Irrigation Ditch to the extent that it will carry additional water as allowed by
State Engineer's Permit, for the above described acreage, and for a supplemental
right to irrigate 5 acres in $SW\frac{1}{4} SW\frac{1}{4}$ Section 14, 3 acres in $NW\frac{1}{4} NW\frac{1}{4}$ of Section 23,

IMNAHA RIVER - 7 -

all of Township 3, S. R. 48 E. W. M., and that such right is subject to the filing of an application with the State Engineer, and the completion of the enlargement before water is to be diverted to any of the above described acreage; and the parties of the second part, being the Park Irrigation Company, organized as a corporation under the laws of Oregon, are owners of the Ditch known as the Park Irrigation Ditch, do hereby agree that the party of the First part can enlarge said Park Irrigation Ditch to the extent above mentioned, provided that he first apply to the State Engineer for a permit. And they further agree that the acreage above described can be irrigated from said ditch after enlargement."

The provisions of the above stipulation are recognized herein and the said R. A. Barton may acquire a ditch right through the Park Irrigation Ditch for the irrigation of 1.8 acres in the SE $\frac{1}{4}$ NE $\frac{1}{4}$, and 4.6 acres in the NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 22, and for a supplemental supply for the irrigation of 5 acres in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 14, and 3 acres in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 23, all in Tp. 3 S. R. 48 E. W. M., provided that said R. A. Barton secure a permit from the State Engineer for the irrigation of said acreage and to enlarge said Park Irrigation Ditch to such an extent that it will carry sufficient water for the irrigation thereof.

11.

That a decree of the Circuit Court of the State of Oregon for Wallowa County wherein W. G. Miller was plaintiff and Katherine J. Fisk and R. M. Fisk defendants was filed in this proceeding which said decree affects the lands tabulated herein under the names of W. G. Miller and Katherine J. Fisk; that by the provisions of said decree plaintiff was awarded prior and first use of the waters of the stream known as Schleur Creek for irrigation, domestic and household use upon his lands as against the rights of the defendants and that the use of the waters of said stream by the defendants is limited to the use for household and stock use except as to the overflow or surplus water of said stream. The decree does not determine any definite quantity of water to be diverted, but simply provided the plaintiff shall have the use of the waters of said creek in the irrigation of his orchard, crops of hay and grain and garden products and for household and domestic use upon his lands. In accordance with the provisions of said decree the right of W. G. Miller is prior to that of Katherine J. Fisk and the quantity of water obtained under said rights shall be governed by the provisions of Paragraph 13 hereof.

12.

That Ehmer Brumbach filed a statement and proof of claim for 3.5 acres in the NE $\frac{1}{4}$ SW $\frac{1}{4}$, 4.5 acres in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ and 3 acres in the SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 20, T.2 N. R. 48, E. W. M.,

and in addition thereto claims an inchoate right for the irrigation of 8 acres in the SE $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 20, same township and range; that in such claim he states that 5 acres were irrigated the first year or in 1893, 2 acres the second year or in 1894, 2 acres the third year or in 1895 and 2 acres the fourth year or in 1896, for a total of 11 acres.

It appears that 33 years have passed between the time of reclaiming the lands to the filing of the statement and proof of claim in these proceedings and that the claimant herein has failed to exercise that degree of diligence to entitle him to a water right for the said 8 acres and said claimant can only acquire rights to the use of said waters of Indian Creek for this acreage by securing a State Engineer's Permit.

13.

That the soil of the lands irrigated along the Imnaha River and its tributaries is composed largely of a decomposed basaltic deposit and underlain with gravel, and the principal crops produced are alfalfa, grain, hays, and garden truck or diversified crops; that owing to the character and kind of crops raised, nature of the soil, the return seepage from irrigated lands, the method and use of the waters of said stream and the climatic conditions prevailing in the vicinity of said lands, a large head of water is required. Because of the wide difference in character of soil and climate between the lands along the Imnaha River and its tributaries and those in the Wallowa Valley irrigated from Big and Little Sheep Creeks and their tributaries, the duty of water for each may be fixed independently of each other.

In the decree determining the relative rights of the various users of water from Wallowa River and its tributaries, the duty of water for the lands in the Wallowa Valley, including some of the lands involved in this proceeding was fixed after extensive and careful investigations as to the quantity of water needed. It is believed that the acre-foot limitation as fixed in the Wallowa River decree is a reasonable duty for these lands in the Wallowa Valley irrigated from tributaries of the Imnaha River and therefore the same limitation used in said Wallowa River decree will be fixed in these findings, with an additional limitation as to the head or rate of flow.

The right to the use of water for irrigation purposes in the Imnaha watershed as herein recognized shall entitle the owners thereof to the diversion of a quantity of water which may be applied to a beneficial use upon the lands to which such water is appurtenant, PROVIDED, that the quantity of water diverted shall not exceed three-eighths of one cubic foot per second per acre of land irrigated, and not to exceed one and one-half acre feet per acre during any period of 30 days during the irrigation season.

That the right to the use of water for irrigation from the tributaries of the

Imnaha River on lands within the Wallowa Valley shall not exceed one-fortieth of one cubic foot per second per acre of land irrigated prior to July 31st of each year, and not to exceed one-eightieth of one cubic foot per second per acre for the remainder of the irrigation season, and a further limitation of one and one-half acre feet per acre during any period of 30 days prior to July 31st of each year and thereafter not to exceed one acre foot per acre for the remainder of the irrigation season.

That the maximum quantity of water to which the owners of such lands are entitled to divert for the irrigation thereof is accordingly so fixed and determined, subject to the use of water by rotation as hereinafter provided; provided that in no case shall more water be applied to said lands than can be beneficially used thereon, and such water to be measured at the point of diversion of the appropriator's individual ditch from the river or other channel from which diversion is made, excepting the water diverted over the divide into Wallowa Valley, such water shall be measured near the north line of Section 19, T. 3 S. R. 46 E., W. M.

In case the water flowing in the channel of the stream sinks or fails to flow down the channel so as to be of benefit to an appropriator having the right to its use, the water master shall allow the diversion thereof by the next appropriator in order of priority who can make a beneficial use of such water.

The irrigation season of the Imnaha River and its tributaries is hereby fixed as the period from April 1st to October 15th of each year.

14.

The rights to the use of water for stock and domestic purposes as herein recognized, shall entitle the owners thereof to the diversion of not to exceed one-tenth of one cubic foot per second for each one thousand head of stock, measured at the place of use; provided that at no time shall more water be diverted for such purposes than is reasonably necessary for such purposes, and to prevent the ditches and channels used for such purposes from being completely frozen. The rights herein recognized for stock and domestic purposes shall continue throughout the year and shall have preference over, and shall be superior to, rights for irrigation purposes at all times; provided, that the use of water for stock purposes shall be restricted to the ditches and channels now in use for such purposes, and that all water users shall so far as practicable provide stock watering holes or ponds into which stock water may be diverted periodically.

15.

The water master of the district in which Imnaha River and its tributaries are situated, may arrange such system or systems of rotation as may be best applicable to the conditions arising from time to time in the distribution of water on such stream.

When two or more appropriators agree between themselves as to a system of rotation, the water master shall distribute water to them in accordance with such agreement, provided that in so doing he does not interfere with the rights of other appropriators.

16.

That the rights to the use of water for irrigation purposes hereby confirmed are appurtenant to the lands herein described, and the rights of use of the waters of said Imnaha River and its tributaries by virtue of such rights are limited and confined to the irrigation of the lands described herein to the extent of said lands herein set forth, and the priorities of right herein confirmed confer no right of use of the waters of said river and its tributaries on any lands other than those specified tracts to which such rights are herein set forth as appurtenant, and each and every person shall be and hereby is prohibited, restrained and enjoined from diverting and using water from said river on such other lands without lawful permit first obtained from the State Engineer.

17.

That except as otherwise determined herein, the order of the rights of the respective appropriators of the waters of said Imnaha River and its tributaries, and in which order they are entitled to divert and use the said water shall be and is according to the date of the relative priority of the rights as herein set forth and determined, and the first in order of time according to the date of relative priority shall be and is the first in order of right, and so on down to the date of the latest right, and those having prior rights are entitled to divert and use the waters of said river and its tributaries when necessary for beneficial use in connection with the irrigation of their respective lands or other ^{useful} and beneficial purposes for which they are decreed the right of use, at all times against those having subsequent rights without let or hindrance, and whenever the water is not required by the appropriator having a prior right to its use for the purpose for which said water was appropriated, he must and shall permit it to flow down the natural channel of the stream as it was wont to flow in its natural course without hindrance or diversion thereof, and those having subsequent rights are entitled to the use of such water and to divert the same to the extent of their rights of appropriation according to the order of priority of their rights; and at all times the waters shall be beneficially, economically and reasonably used without waste by those having a right to the use of such water, and no rights of appropriation are hereby confirmed to divert a greater quantity of water than such appropriator can beneficially use for the purpose to which the water is to be put.

That except as otherwise modified herein, the rights of the various appropriators of water from Imnaha River and its tributaries, arranged in a tabulated form, with the dates of relative priority of such appropriations, the number of acres to which such appropriations are applied and are now limited, the use or uses to which said water is applied, the name of the ditch or other means by which the water so appropriated has been diverted, the name of the stream or other source from which the water has been used, the description of the lands upon which the water has been used, the tabulated rights of each appropriator being set opposite and following his name and post office address, are as follows, to-wit:-

Name and Postoffice Address of Appropriator	Date of Relative Priority	Amount Cubic Feet Per Second	Number Acres	Use	Name of Ditch	Stream	Description of Land or Place of Use
9312 Arnold, A. F. Enterprise, Ore. (Proof #1.)	1901		2	Irrigation and stock		Little Sheep Creek	2 acres in Lot 8, Section 1, T. 1 S. R. 47 E. W. M.
